Work Experience

Golf Course Maintenance

Meridian Golf Club - Lone Tree, CO

March 2022 to Present

My position would include overall upkeep and maintenance. I became their main cup-cutter, and would change tee locations daily. Additional responsibilities included mow greens, rake bunkers, mow tees, and other duties in relation to irrigation.

Sales Manager

Lake Time Boats - Hayward, WI

March 2017 to August 2020

I would sell luxury pontoons, as well as manage 2 other salesman every day. This required me to work with many types of people working under me as well as different types of costumers. I found this to be extremely crucial in my work ethic as when your a manager, you can't always decide who you are managing. I also organized rentals for the fleet of 40 boats we rented by the week, Saturday to Saturday. This would require lots of concentration and quick thinking as we got boats in, washed them and got them back out to our renters. This made me perfect my quick decision make which I find incredibly valuable still to this day. I also helped organize engine sales, the installation, and testing. This would only happen occasionally, however, I found this experience to be very interesting as I got to experience the technical side of the business.

Education

GED
